

The Game Master will wear a mask and hydro alcoholic gel for personal hygiene.

The material used for the development of the Escape Room will be disinfected when the activity starts. The Game Master will use a set already disinfected for each bubble group.

Between groups, the Game Master will disinfect the necessary material (tables, chairs, etc.) and will ventilate the classroom (at least 10 minutes.)

The Game Master promises to take the temperature and check for symptoms, the days before the date of the activity, and the same day before leaving. Transeduca promises not to carry out any activity if it is aware that the Game Master has any symptoms that are compatible with Coronavirus.

We request that the school that has suspicion or confirmation of the existence of any person (from the group that is to do the activity) with symptoms compatible with COVID19 or a positive case, notifies us as soon as possible so that we can reprogrammed the activity.
