

It is important for the students to come prepared, having already worked the vocabulary list prior to the activity and the context of the Scavenger Hunt.

Students should already be in teams of four or six before we begin (no more than 6 teams). And each group should have a good balance of skills and English levels so that each team has the same chance of winning.

Each student should bring the name badge they have designed.

The centre must provide each student with a pencil and eraser.

We must know, at least 2 weeks before, the exact number of student in each group for each activity.

If weather conditions hinder the activity from taking place, the location may be changed. You must report the new location to the Game Master.

There must be one teacher present throughout the activity. It is recommended that this person are the reference teacher of English.
