

It is important for the students to come prepared, having already worked the vocabulary list prior to the activity (we have only included the meaning of the word that is relevant to the activity and we have highlighted the words that are particularly important) and the context of the Scavenger Hunt.

Students should already be in teams of four or five before we begin (no more than 7 teams).

They will need their phones for the photo challenges. You might like to take a phone number for one student per group in case of emergencies.

Each student should bring the name badge they have designed.

The centre must provide each student with a pencil and eraser.

We must know, at least 2 weeks before, the exact number of student in each group for each activity.

There must be one teacher present throughout the activity. It is recommended that this person are the reference teacher of English.
